

OnSpec Oscillators

OSO-RV?-C030

3.3 Volts Supply available on
OSO-RVC-C030 & OSO-RVA-C030

Voltage Controlled Crystal Oscillators (VCXOs)

Standard pulling range ± 100 ppm

Frequency range 60 kHz to 120 MHz

3.3 Volts Supply Available

Fast Delivery Services:-

6 day, 2 weeks or 3 weeks

100 ppm VCXOs for phase locked loops, where the pulling range is large enough to lock onto standard crystal clock oscillators. The centre adjustment is guaranteed, which can be useful if the VCXOs are also used when not phase locked.

Pulling ranges, including ± 250 and ± 300 ppm are available, with slightly different specifications.

For ECL output, use RVE-C030

For resistance weld package, use DVC-C030

Unless a resistance weld package these Oscillators are not hermetically sealed
